SXT Tonneau Cover

Style-X's presents the new functional Tonneau Cover for the **Toyota Hilux**.

The basic design emphasizes the look of the pick-up and offers additionally a lockable and hidden storage room in the vehicle. It also precisely matches the unique contour of the pick-up, further enhancing a factory look.

The **SXT tonneau cover** is painted to match OEM colours using OEM-standard basecoat / clearcoat paint method and an automated drying system.

The mounting is done with a **specially developed frame without any drilling or permanent changes to the pick-up**.

The double side locking-mechanism meets the standard of modern vehicle manufacturing.

As the Cover can be opened completely, no demounting is required, in case that big items should be transported. Especially for this a separate locking was developed to keep the Cover in place, when it is opened completely.

Standard Features

- 01 Hand-laid fibreglass double-shell for added strength and individually designed for each vehicle
- 02 Strong lifting-mechanism made of metal (powder coated)
- 03 simple one-hand-handling – also for opening the Cover completely
- 04 mounting without any permanent changes or drilling at the vehicle
- 05 synthetic carpet at inside of the Cover
- 06 double-locking-mechanism with lock
- 07 available in two versions: with and without stainless steel sports bar
- 08 can be locked when opened completely

01 closed

02 opened in the back

03 completely opened
